So, that (superdyn-amic-energy of ॐ) prevails everywhere in universe (as <u>cosmism</u> or <i>Omism</i>), i.e. from an every atom / cell to cosmos.

	<p>“ॐ”, all the dynamic / superdynamic-forces of the souls (•) & Supreme-Soul (•) are the zero. If our soul (•) is an infinite-nonmolecular-biopacemaker of the human-mind-&-body, then its Godfather the ‘Supreme-Soul’ (•) is an infinite-nonmolecular-cosmic-pacemaker of the universe. 	<ul style="list-style-type: none"> • The Omism (or Ohmism) of cosmic-word-“ॐ” (OM or Ohm) itself is the Omnism of the whole universe. And all the meanings of triple-words the omnipotent, omniscient & omnipresence are thus involved in this singular-like Omism of the ॐ. (In terms, ‘Ohm’ & ‘Ohmism’, ‘h’ is silent, when we speak.) According to western-philosophy, this ancient vedic-term the ‘Omism’ is knowingly / unknowingly explained, as the ‘Omnism’ which is used as in a regarding of the omnipotent, omniscient & omnipresence-states of the Supreme-Power. Means, an ancient vedic cosmic-word “ॐ” (OM) is itself hidden in a western-word the ‘Omni’.

Actually, a common-man has <u>5 types of kala</u> or special-senses or naturally flowing <u>psychobiological-art</u>. But, according to vedic-philosophy, there are cosmocellularly & /or cosmospiritually 64 types of Kala (supernatural-specialities or superabilities) of the special-knowledge of everything of universe that includes all triple-creations of the universe, that are the physical, astral & subtle worlds. Only Cosmic-Master-Mind of the universe Lord Shiva Who has such all the cosmic-possibilities-&-potentialities which are organised through His different 64-special-arts (<i>kala</i>) of the universe. According to well-known <i>Dorland's medical-dictionary</i>, - the term, 'anthropomorphic' or 'anthropomorphism', means, an attribution of the human-characteristics to nonhuman-objects; or an attributing of human-shape or characteristics to Gods, objects, animals; in the other words, a man-like image; or the God Who takes an <u>incarnation</u> (<i>Avtar</i>) on the earth, in a man- like physical-body. So that directly / indirectly, according to vedic-philosophy & cosmo-cellular-law, these all things can shortly be defined like,--- the God Who takes an <u>incarnation</u> (<i>Avtar</i>) on the earth, in a man-like physical-body.

Whole universe is multiplied from Him, like a multiplication of the single-cell into an infinite number of its daughter-cells by a cell-division-process. Thus, a nonmolecular Single-Supercosmic-Force (or <i>First-&Final-Cosmocellular-Cause</i> of the universe) is cosmo-cellularly multiplied into infinite number of the molecular-based physical universes, during their first big-bang-blasts. And this vedic-concept of the “<i>whole universe or cosmic-egg is as the Shivmay</i>”, has been symbolized & then worshipped as in a divine-form of the oval-shaped ‘<i>Shivlinga</i>’ (i.e. as a dwelling of the lord <i>Shiva</i>.) And we also know that according to ancient & modern-astronomies, a shape of the cosmic-egg is also an oval-shaped. In short, it can be said like,- “<i>the absolute is hidden behind the relativity</i>”. As per Herbert Spensor, (in 19th century); universe is divided into two parts, one is ‘<i>known-universe</i>’ and second is ‘<i>unknown-universe</i>’. Vedic-science also says that the ‘<i>unknown</i>’ is behind the ‘<i>known</i>’ one. That means, a rule of relative (part) is only possible; when a rule of wholeness (absolute) is previously prev-aded there. If it is true. Where this “<i>full of emptiness</i>” is nothing, but it’s an <u>intangible-parts</u> of the every atom or matter, which is remained as a dark-energy or dark-matter. (7)	WHY MEDICINE IS AN ART, NOT A TRADE?	
	<ul style="list-style-type: none"> A physician should also become a <i>metaphysician</i>, to get a better knowledge about the human-body & its Creator. Means, he should not do his (professional)-practice as a ‘doctor of medicine (MD)’ only. But, he should also do his (such medi-cospiritual)-practice as a ‘medical-deity (MD)’. In a medical-field, his such medical-decision is as the result of his forceful ‘medical-intuition’ (or ‘medical-meditation’). 	
	<ul style="list-style-type: none"> After-all, biologically / cosmobiologically or cosmocellularity, ‘Life’ is nothing but it is just a dynamic-expression of the non- molecular-energy, at the different special-molecular-levels of ecosystem of the earth; and these all different special-molecular-levels of the dynamic nonmolecular-energy at the ecological-scale, are biologically known as the different “<i>living-species / beings</i>” : (thus, ‘Life’ is nothing but it’s just nonmolecularly-molecular expression of the energy-changes-&-exchanges among the special-molecular-matters. 	<ul style="list-style-type: none"> During primitive-era of crude-but-pure herbal-medicine, the first ‘cry of pain’ in a jungle, was a ‘first-call’ for the ancient physician. Hence, medicine is an old science as man’s-history is old. Therefore, medicine is a natural art, not trade. As it is natural-art, should be conceived in sympathy & born of the necessity. So, later, from such all the instinctive medical-procedures, there has been developed a <i>‘specialized-science’</i>. And today, that is still practised, aswith a name of ‘modern-medicine’. 	
	<ul style="list-style-type: none"> Actually, the word ‘Hospital’, is a Latin word, it means, ‘guest’. But, nowadays, there are a very few hospitals which are worked as a real hospitable.) So, all the clinicians should be aware of them. Sometimes, it is still realized that in a common-complaints of the patient, a general-practitioner (G.P.) &/or resid-ent-medical-officer (RMO) is / are practically more helpful than a specialist (MD / MS). 	<ul style="list-style-type: none"> After-all, the subjects of the <i>“drugs & their actions”</i> are as old as the diseases. An illness has been come with a man, since his primitive-stage. The writings of world’s oldest pharmaco-pia has first been come, from the India & then from China. In India, it is known as ‘Ayurveda’ (vedic-medicine or herbal-medicine). In Ayurveda, deity of ancient medicine, is symbolically called as ‘Lord Shree Dhanvantari’ (ancient natural chemist cum pharmacist). His symbolic divine-pot contains a life-saving (<i>Sanjivnee</i>) divine-fluid (<i>amrut-ras</i>), i.e. the extract of the herbal-medicines. The great herbal medicine & Chines materia-medica ‘Pan Tsao’, both were probably written, in 2500 	

	<p>B.C. Which contained many vegetables and metallic-preparations, a few animal-products including toad's eyelids, snake's-venom, elephant's & tiger's bones etc. And as the time went with the constant instinctive procedures in medicines, an absolute-medicine has later been come out, & which becomes popular as a 'modern-medicine'.</p>	
	<ul style="list-style-type: none"> • A modern-medical-system was also an Indian in origin, as in a search of "<i>First-systematised-medicine</i>". Thus, Ayurveda is a maternal-medicine of all the medical-sciences that from which all other ancient & modern medical-sciences have developed; (likewise, 'Sanskrit' is a mother-language of all the languages of world, and from which all the languages have been developed). An evolution of Ayurveda was absolutely from India, which developed as a natural-system of 'Herbal-medicine'. Where a definition of '<i>Ayurveda</i>', is chiefly implied as "<i>knowledge of the life, knowledge of the health</i>". Thus, Ayurveda has provided an empirical-platform, to make a progress of all the systems of medicine, which all had been come, since a <i>first-cry of pain & first-call of physician</i> in early Jungle-life of human-being.
